

## BONAPARTE TO GET OUT OF CABINET?

Chicago Hears Rumors  
of Hith With Adminis-  
tration Over Alton  
Case.

Attorney General, Report  
Says, "Declines to Be  
Scapegoat for Trust  
Fiasco."

CHICAGO, Sept. 14.—A sensational rumor that Attorney General Bonaparte's resignation will shortly be announced gained credence here tonight. The information is derived from sources which give it almost official authenticity. The resignation of the head of the Department of Justice is said to be impending because of a coming sudden reversal in the policy of the Administration in its frequently announced determination to make relentless war upon trusts.

The Standard Oil case is said to have raised the issue between Attorney General Bonaparte and a high power which must have an inevitable climax in the retirement of the former.

Alton Case Started Breach.

The first sign of the breach between Mr. Bonaparte and the Administration was the postponement of the announcement of the department's decision in the question of granting immunity to the Chicago and Alton railway because it aided the Government in convicting the Standard Oil Company, the infliction of the \$25,000 fine following.

According to disclosures, Bonaparte found that the then district attorney, Charles B. Morrison, acting for the Justice Department, promised immunity to the railroad. While the present Attorney General regarded this as a pardonable exigency of that prosecution, it is rumored he was amazed to find that immunity had also been promised in every other case against the same company where other railroads were equally culpable with the oil company. This would have received Mr. Bonaparte's condemnation as an extra assumption of judicial power by the Justice Department, but it is said he also found that not only had immunity been granted half a dozen big trunk lines which had resorted to rebate abuses for years, but to scores of high railroad officials. By this wholesale immunity granting the preceding administration of the department had practically tied the hands of the Government.

Reflection on His Ability.

The report is that the pledges given necessarily bind the Justice Department to a policy which in Bonaparte's opinion will reflect discredit upon the Attorney General and make it appear as if his inability, if not incompetency, caused the coming failure of the anti-trust crusade.

Mr. Bonaparte is said to be indignant at what he terms the obvious design to make his department a scapegoat for a national fiasco, and has delivered the ultimatum that he must be allowed to "bust the trusts" as the ethics of his office require.

The ultimatum has resulted in the arrival at an understanding which provides that when negotiations now pending for his employment as counsel for a big New York corporation are concluded, his resignation will be announced.

ONLY CIRCUMSTANTIAL.

Wigg-Newick wasn't born with a gold spoon in his mouth, was he? Wagg—I fancy not. At any rate, he eats with his knife now.—Philadelphia Record.

## "NO WIFE" CLASS IS INEXCUSABLE

Bachelor Maids Outnumber  
Their Brothers in  
Washington.

Every Man Could Marry  
and Leave Over 17,000  
Spinsters.

There is not a reason that can be offered by the bachelors of Washington why they should be living a single life. On the contrary there is every reason why they should get married. The Washington matrimonial market is overstocked with young and old women, who, if they had the chance, would marry.

Women in Majority.

According to the police census made to the Commissioners in April last, there are 17,715 more women in the District than there are men. Just think of it—seventeen thousand, seven hundred and fifteen more women than there are men, and it is natural to presume that a large majority of that number are of a marriageable age or soon will be, and are willing to take unto themselves a husband. Every man here could marry and leave 17,000 old maids.

The surplus of women is, of whites, 8,547, and colored, 9,168. The male population is placed at white, 112,128; colored, 45,529. With the official fact that there is an army of unmarried women in this city, the bachelors should get busy, make a selection, and call on the person to perform the ceremony.

Not long since some zealous citizen wrote a letter to the Commissioners suggesting that they ask Congress to pass a law to tax bachelors \$100 a year and a tax of \$50 on the bachelor girls. However, the proposition to tax the women, considering that there are so many more women in the District than men, would be an injustice.

Up to Merchants.

If some enterprising merchant with house furnishings and furniture would offer a prize of his wares for brides and bridegrooms, residents of the District of Columbia, who would marry within a certain time, no doubt there would be an avalanche of marriages in Washington that would cut down to some extent the surplus of unmarried women in the city.

YOUNG MEN WANTED  
TO LABOR FOR SCIENCE

One of the scientific discussions on heredity before the British Association suggests a new pastime, eminently suited to garden parties and picnics. It has to do with the color of the human eye. So far as science is concerned there are only two kinds of eyes, those which are blue and those which are not. Blue is the natural color of the eye; all the other hues, described as a hazel or gray, green or violet, are due to flecks of pigment or color super-imposed on the blue iris; and science roughly dubs them brown. Now, the children of two blue-eyed people will always have blue eyes, but if people marry whose eyes are not true blue then there is always a probability and some times a tendency on the part of one or more of their children to revert to blue. Thus two people, one of whom has hazel eyes and the other what are usually described as brown eyes, might quite normally have a child with blue eyes, because blue is a color which tends to reassert itself. Science, in the person of those zoologists who believe in the Mendelian theories of heredity, is trying to go further than this and to say when a blue-eyed and a brown-eyed person marry what proportion of their children will have blue eyes and what proportion brown. But the scientists are at present at a standstill for want of enough facts and figures to go upon. Consequently any earnest young man who asks an attractive young lady if she may closely examine her eyes to see how far they corroborate the Mendelian theory when compared with those of her parents will be regarded as doing something to advance the progress of knowledge.—London Graphic.

THE COWARDLY MOUNTAIN LION.

Many attempts have been made to hold up the mountain lion as a true lion in point of bravery and courage, says Charles F. Holder, in the Travel Magazine, but the consensus of opinion is, of those who have hunted it, that the mountain lion is a coward, that the instances where it has attacked man are few and far between. Almost any animal will fight when cornered like a rat, or in defense of its young, but the mountain lion has, at least to my knowledge, never been known to charge a camp of men, though I do know an instance where a cougar swam to a small key in Florida and sprang into a camp and stole a pig that was being used as a lure, taking the animal from among the hunters, who were demoralized by the apparent courage of the beast.

## FALLING WALLS CRUSH OUT LIVES

Two Killed, Six Hurt in a  
Wrecked Cincinnati  
Building.

CINCINNATI, Ohio, Sept. 14.—Two persons were killed and half dozen seriously injured by the collapse of a four-story building at 625 and 627 Central avenue, this afternoon. The ground floor of the building was occupied by William E. Dohan, a shoe dealer, and those above by a number of flat dwellers.

A new front was being placed in the store room, and under the stress of the repair work the front wall of the structure fell outward, across the sidewalk.

The roof and upper floors dropped into the cellar.

One of the killed is an unidentified white man about sixty years of age, who was walking along the street, when he was caught under the debris. Mrs. William E. Daley, a widow, who lived in the flat on the second floor, was crushed to death in her bed. The seriously injured are William Leggett, William Gleason, and J. B. Dushane, all workmen employed on the repair work.

The clerks and customers in the shoe store and the other tenants in the building escaped with minor injuries.

## MONEY GROWS EASIER AS WEEK ADVANCES

NEW YORK, Sept. 14.—Call money was quoted nominally at 6 per cent today. The early part of the week witnessed a moderate stringency in the market, incident to the New York city bond subscriptions and the Union Pacific payment. On Monday loans were made at 6 and 7½ per cent; Tuesday, 6½ and 7½; Wednesday, 5½ and 6; Thursday, 4 and 5; and Friday, 4½ and 5 per cent. The redemption of the Japanese 6 per cent bonds was a factor in the easing of rates during the latter half of the week.

Time money during the week showed an easy tendency, and at the close moderate offerings were made of six months' money, which met with a fair demand.

## MISSISSIPPI MURDER CASE POSTPONED UNTIL MONDAY
